

Components

- Navigation:
class feed, submissions, analytics, notifications,
- Content blocks:
posts, comments, bulletin-board
- Inputs:
text fields, drop-down menus, sliders
- Actions:
Submitting posts, adding comments, annotating or removing/flagging posts (teachers), giving credibility scores
- Feedback:
URL validation, loading screens while articles are being uploaded, confirm screens to make sure students are submitting correct links

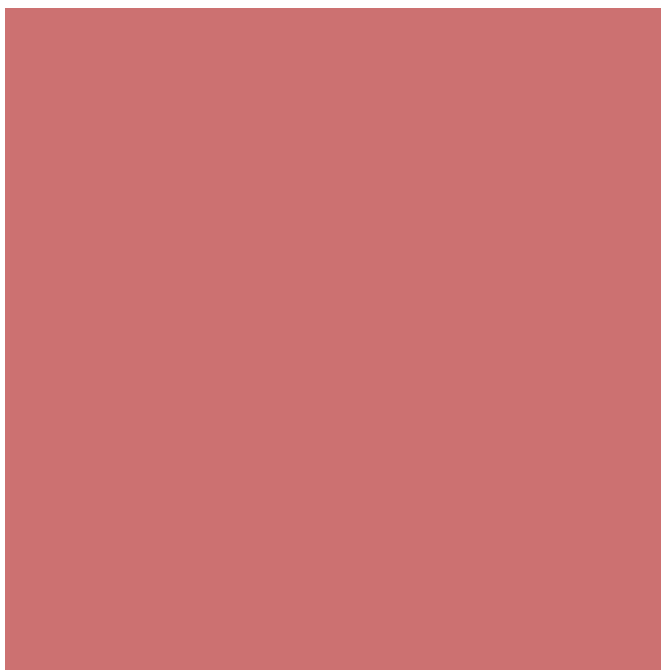

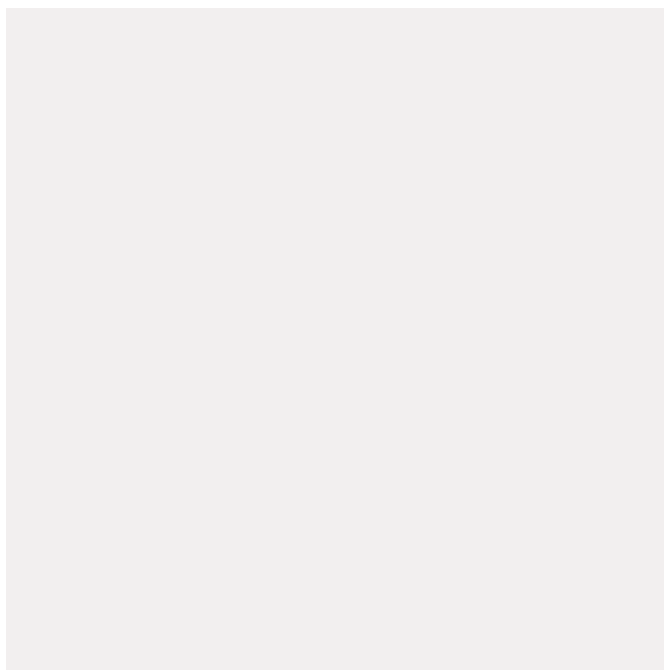

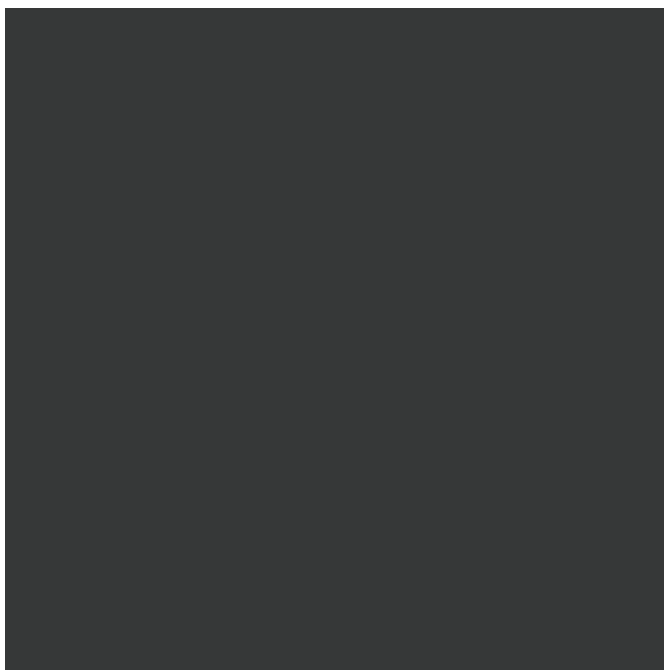

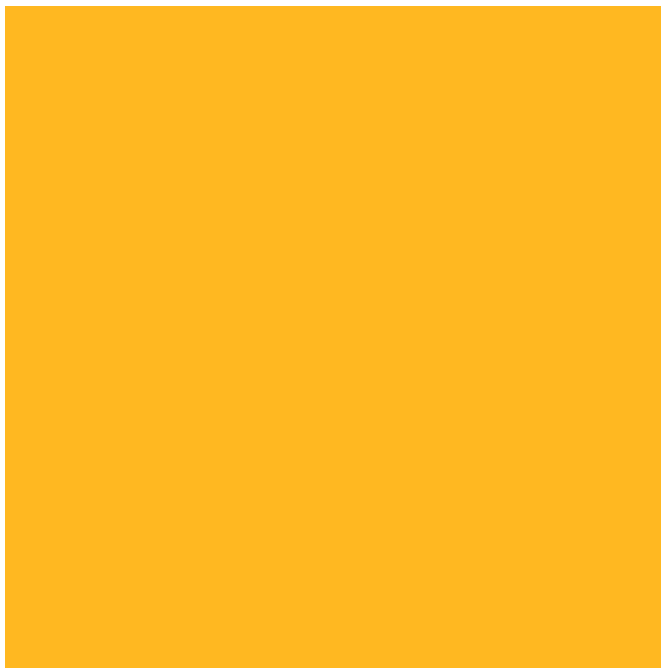

System Rules

1. Students and teachers play distinct roles. Students post, discuss with each other, and view teacher notes/annotations. Teacher’s observe classroom interactions, add notes/annotations, but do not post sources themselves.
2. Each submission is reviewed by teachers before being shown on the general class feed. There are multiple layers of confirmation: on the student end, they see a confirmation screen before submitting, and on the teacher end, where there is a final confirmation screen before sending to the feed. This makes sure that the feed is class appropriate.
3. Teacher notes will show up in the notification box, along with on the posts themselves. Teachers can choose to make notes/annotations public or viewable only to the student who posted. Teacher notes will appear as a teal pop-up box.
4. Navigation stays at top of the screen, with the feed showing up like a bulletin board.
